JA[illegible] 1908

"THE trotting horse is becoming the horse of the people. Why is this? Because he has the qualities which fit him for the uses which the modern man has for horses. He has intelligence, endurance and 'legs of iron, and sinews of steel.' In short, he is a horse of civilization. If size and weight are required, the trotting bred horse will furnish them so far as compatible with suppleness of action, great endurance, style and ability to go to long distances fast and come back at the same gait. He comes bearing claims to practical utility in an age that is largely industrial. He brings with him that charm of usefulness which secures recognition not only on the race track but from the man of industry and business—in fact, everywhere a horse can be used. He has a place on every farm,on the road, in the livery stable,and as an all-purpose horse he is right at home. He is the companion of gentlemen of leisure, and is the horse for the man not cumberously burdened with this world's goods. He is a necessity to the rich, a boon to the poor and a luxury to the great majority that are neither rich nor poor. From his loins shall come the American horse of the future, which will as far excel the members of the equine race elsewhere as his master will excel his brothers of all nations."

"An ideal horse is one with a good sound constitution, a good stomach, a brave heart, good limbs and a level head, and of course a right way of going. The more brains he has, the more endurance he is likely to have. It enables him more readily to conform to circumstances and understand what is wanted of him, and to take advantage of opportunities and to make the most of everything. By educating the brain it increases in size, fineness and quality. If he is treated badly he is more or less useless."

Montana, everything considered, grows the best horse in the world. The soil, climate, grasses, oats, pure water, dry atmosphere, altitude, latitude, valleys, benches, foot-hills and mountains, combined, produce the best feet and legs (solid, tough and dense horn and bone), muscle, lung-power (depth through the heart), endurance and weight not found elsewhere.

Alcone has always shown great natural speed and could have taken a record of 2:20 or better had he been given the opportunity. He has very fine action at both ends and is a horse of remarkable beauty and conformation, stamping his likeness and color on most of his get. His opportunities have been very limited otherwise he would prove himself, without any doubt, as the greatest son of Alcyone, who in turn has always been recognized as the greatest son of the great George Wilkes considering his premature death.

The breeding of Alcone is of the gift edged kind as a glance at his pedigree will show. He is an inbred Hambletonian with an infusion of Clay blood through his grandam. At the close of 1902 he stands sixth among the 48 producing sons of Alcyone but will soon climb up to a higher position now that he has the opportunity of serving high class mares.

His get are all pure gaited and have natural speed and handsome conformation. He is a very prepotent sire and it is too bad that most of his life was spent where he had access to but very few good mares and was not appreciated.

Sire of the second dam of Hambrino, 2:21¼, (sires of 17 standard performers.)

4th dam MISS LANCESS, by LANCE (Thoroughbred.)

Alfonso has the distinction of having the largest number of standard performers among the 27 producing sons of Baron Wilkes 2:18, the greatest of money winning sires. He is a horse of rare individuality, with beauty, style, action and substance. As a son of Baron Wilkes and the great Alma Mater, his breeding cannot be excelled. His sire, Baron Wilkes, has nine 2:10 performers, a record equaled only by one other stallion, namely, the great Onward; while both have nine in the 2:10 list, yet the former has three with records of 2:10½, while Onward has two in 2:10¼ and 2:10½. Therefore it can be said that Alfonso is the son of the greatest speed producing sire. As a producing mare Alma Mater is surpassed by only two others in the great brood mare list, but when her progeny, through her producing sons, are considered, she shows a record equal to any in the list.

3d dam.....by SKINNER'S JOE,

Jubilee de Jarnette is one of the greatest trotting bred show horses as is evidenced from the numerous prizes and ribbons he has won in the show ring. His great beauty, style and action comes to him from both sides. His sire Jubilee Lambert is one of the best representatives of the Daniel Lambert branch – the handsomest of the Morgan family and on his dam's sides he inherits the best qualities of Indian Chief, the great saddle and show sire of Kentucky.

Jubilee de Jarnette has all the qualifications to sire horses of the highest beauty, style and conformation, besides transmitting speed enough to make his progency very desirable for the track, road or the side drives.

2d dam.....by RED JIM.

Son of Foreigner, by Imp. Glencoe (sire of the second dams of Palo Alto 2:08¾, Lakewood Prince 2:13½, Favonia 2:15, etc.); dam by Zenith, son of American Eclipse; second dam, by Medoc, son of American Eclipse.

3d dam.....by BELL MORGAN 61.

Sire of Lady Turpin 2:23, and dams of Goodbye 2:19¼, Onslaught 2:28½, Everett Wilkes 2:30. Son of Cottril Morgan, by Black Hawk 5.

The breeding and individuality of Keeler make him one of the most desirable stock horses kept for public service. He is a very handsome horse with great action and style at both ends. He has a beautiful neck, fine eyes and muzzle, great individuality, wonderful constitution and power, in fact every quality that combines to make a stallion capable of reproducing a very desirable type of high class horses.

Keeler's record as a race horse is a matter of history and needs no comment. At his time he was a consistent campaigner, a great money winner in all his classes and one of the handsomest horses ever raced. By the records he is the fastest of the 40 standard performers of King Rene and the best producer by that well known son of Belmont 64 and the great brood mare Blandina.

That Keeler not only inherited speed of the highest type but has the ability of transmitting the same to his progeny, is already proven by the performances of his get. His son Chase was the fastest green trotter of 1902, getting a record of 2:07¼. He campaigned well, won a big share of the purses he competed for and closed his successful season the third best money winner of the year, and this despite the fact he was handicapped by having to give way in some cases to his stable companion, Rythmic, both horses being entered many times in the same class. Onoqua 2:08¼ was another of his get whose sensational performances as a colt and later are still fresh in the memory of all.

4th dam LENA PEPPER.....by SIDI HAMET.

Second dam of 2 standard performers.

Vice Regent is a horse of splendid conformation; he looks very much like his full brother, Prince Regent 2:16½, and if anything is a better finished horse. When a two year old Vice Regent was considered by many competent judges, among them Mr. Bradburn of the Village Farm, as the best and greatest two year old on that well known breeding establishment. He carries the blood of the best producers on both sides, and his pedigree, as will be noticed by a glance at the tabulation, is made up of the very best trotting strains. He is a producer of speed, style, action and beauty.
